

WHS 004 – PLANT AND EQUIPMENT

Sterling Construction Services carries out regular inspections and maintenance of all plant and equipment.

Sterling Construction Services ensures plant and equipment is inspected and maintained in accordance with the relevant standard and manufacturer's recommendations.

The inspection and maintenance history of each item is documented.

Certain items of plant and equipment will be “Item Registered” and or “Design Registered” by the Regulatory Authority where required by legislation.

Sterling Construction Services ensures control measures are implemented and documented for all plant and equipment, including its operation, deemed as high risk. The effect of all plant and equipment on the workplace is considered and documented in the Safe Work Method Statement.

Pre-Start checks, schedule of maintenance and fault reports are notified to the Works Supervisor, documented in plant log books and made available to relevant parties on request.
